

Edu GamEco
Youth Exchange, Lefkas, Greece
Final evaluation questionnaire

At this point of the project, we need your feedback and we ask you to **fill** this questionnaire. We are collecting this kind of information in order to check the results of this project. **Your point of view is important. Read carefully** questions and items and **put a cross** on the answer, which represents best your judgement.

Name

Logistics, accommodation, food

The accommodation: 4 2 11 9 17
 The food: 3 5 8 10 5
 Activity spaces: 4 1 8 9 10
 The timetable: 1 3 3 11 13
 The free time: 3 1 1 9 16

Comments about these:

I liked that everybody was happy to help.

I have no problems with living in tents, but during the day they were getting too hot to stay in and I couldn't sleep in the afternoon when I was really tired.

The food was fantastic.

For me everything was perfectly organized, I enjoyed time for 2 weeks, especially because all volunteers and Reka did their work for 100%.

Bad connection internet.

A paradise background, really first time is Greece. Weather, Landscapes, sea, everything is perfect. Food was good, love the fact that it was prepared for us.

I would like to have a free afternoon more to test.

We could start our activities earlier than 9 a.m.

I like sleeping in a tent. We have a swimming pole and a bench close to our camp. The food was very tasty. Activities were very good, creative.

Accommodation issue was not organisations fault and inconvenience is mostly based on personal reason.

Living in a camping place is not a problem but it would be nice to have a special workplace not a place for everyone in the camping to avoid annoyed the others and to feel more comfortable.

I used to tent and I liked food because everyone still cook better than me. Everything was really cool.

And we really had a lot of free time it was perfect.

We had few problems but I have nothing to complain about because we had chance to adapt and expand our horizons.

I expend to eat greek typical food and the learn much more about Greece. The activity spaces were comfortable and beautiful. The accommodation wasn't so much comfortable but that wasn't a big problem.

The accommodation would have not been so bad if it wasn't for the weather so it's not your fault. The food was excellent. The timetable prevented us from getting bored.
 I like the fact that we were in a camping. It's ok for me. About the timetable it's doesn't fit me to stay seeing and in the morning, and listening. I am not keep fighting not to sleep.
 We should have more free time because we are been working a bit of time and it' so hot.
 We need more variety of food, better places for sleeping and bigger spares for the activities.
 It's necessary to sleep in a bed because they have been too much time sleeping on the floor.
 Timetable: sometimes give as to work in our project has been to short and we have had to use our break time. Free time: should be in the middle of week.

Introduction activities

Welcome, getting to know each other: 1 2 2 11 16

Getting to know the program: 4 1 5 11 11

Your motivation, thing you wanted to learn, who can help in your learnings:
 0 4 4 14 10

Did you understand the purpose of the youth exchange and did it fit your expectations? How?

Yes I did, I was ready for what I had received.

How I understand it better and it almost filled my expectations.

Yes, I understood the purpose of the youth exchange, and it fit my expectations because I was able to understand what eco means.

I actually think that on practice, the content of the YE was better than as seen on paper.

Yes, I wanted to get out of my daily routines duties. I knew before about YE I'd like to participate because for me it was the last chance.

I think I understood especially while I was creating toys.

Yes, but my English was bad and I was participated not in much activities but I really wanted.

The topic was clear, but the way things happened was not, but mostly because of pay organisation that didn't really explain everything. But finally it was good.

Yes, I had development.

The exchange fit my expectation although I hoped to have more information about the ecological aspect.

I understood what this exchange planned to train, and it fit my expectations in the way the activities were organised.

Yes, it wasn't difficult. I was able to give my opinion and I learnt lots of things.

Yes understand, I can't get to know people. Some people are closed.

Yes I don't and it completely fits with what I was expecting.

I understood the purpose. It was really interesting to made your own toys. It helped to develop new skills how to make sth by yourself.

Not at all. At the beginning (lake of communication on our French organisation)

for me 3-4 first first days were a bit useless (or pointless / too strict / too childish)

Yes I did understand but I didn't have any expectations because we really could to everything.

But everything was great.

Yes, projecting a toy present is to kids was very useful. We learned a lot.
Yes, I did. The purpose of the youth exchange was exchange was to rise awareness about everyday common toys dangers and to understand we can have ecological toys that can be funny and with a pedagogical aspect. It fit my expectations and I understand that during the activities.

I understood it's purpose and it exceeded my expectations because you were really well organised and prepared.

Yes, I did and my expectations were satisfied because I learned how to break borders (language, shyness, culture)

To me the purpose was mostly to meet people from different countries.

Yes, i have understood the purpose of the exchange and it fit my expectations, because we were learning a lot of about the different games of different countries at the same time that we are having fun.

Yes. I do. I'm psychology and I'm so happy to do the exchange because I can learn a lot of things useful for my work.

Yes, creation of the game, theoretical and practical activities.

Do you think the group dynamics was good? Why?

Yes' because they let ask to know each other.

The team spirit was good.

I depends. The most times I think dynamics work but it necessary change people all time in order to know each other.

Yes, because we had learn a lot of.

The dynamics was very good (not perfect) but it's normal because nor everybody think at the same way. It is also because we are form different countries with different costumes.

Very good, everybody (except a few) were in good conditions.

Yes, because we have built a real team without exclude anyone.

I think group dynamics were good but there was a problem of communication with some people because they were not capable to speak and understand English.

Yes it was good because there was felling between all of us.

Yeah it was good. We were all the time wearing all together. I spent a whole exchange only in English it was so nice to live.

Yes, I love it.

Yes, because between French people we can help.

Yes, the only difficulties was to be a mediator all the time.

The group dynamic was good. At first we just started to know each other but this everyday mixed helped to work with different people and to provide new ideas.

It was excellent because we spent a lot of time banding together during free time.

It was good but not great. Some people don't want to integrate and they spend time with the same people.

Yes, we created a great group, completely and cooperation were the base.

I think the dynamics are perfect to break the ice.

It was good. They was smile, friendly, nice.

The group was dynamics and well.

It was, people were not scared to talk and work together, of course there were some tensions but it's a common thing.

All was super. International team.

The group dynamics was quite good. Sometimes I have people in national groups but in the end everything was great.

They were a lot of us (because of age) group was really big and it was difficult to involve into

working process everybody in the same time.

Overall yes, they paper people were smart. My working group was rather superficial and it killed my. Motivation to do sometimes with them.

Yes, because in the end we realised that our dream become true.

Yes, because we got well along with each others.

During the day dynamics was low due to the heat and sleepy mood.

Intercultural Activities

Intercultural Night:  1  1  0  4  26

Videoprojection – videos created by partner organisations:

 3  0  3  14  12

What did you learn about the other cultures?

I learn to listen and make conclusion.

A lot, for example way of living.

The ideas of games were useful.

We all are different, I need time to get used with it.

I learnt that every country in Europe are playing the same games but with variations everywhere.

National food.

Mostly languages, and typical drinks.

I learned a lot form diffrent cultures.

I learned about food.

I have proved that although we leave in diffrent coutnires some times we do the same things.

There are many things that I've learnt but the most important one is to be united in diverssity.

I learnt about their typical food and expressions.

I learnt about food, weather, some new words.

The cantries represented as well as their cultures were already know by me but it was still nice that participants made beautiful presentatnions.

We all have a

lot of things that are the same but a little bit diffrent. And the French people have a good wine.

A lot more that the palce have heve to write it.

Estonian and Italy.

Yes, Estonia.

Diffrent habits but i discovered that we are very similar.

I learned that there a lot of stereotypes we should remove each other. Overall, I spent time leaving few hands from each culture.

Their food, music and their idioms.

So much.

I've known some new words in diffrent languages and I've too know new countries.

A lot of things. Their traditions, celebrations, languages, weather in their countires. Food are very diffrent.

The typical dish drink and their traditions.

Free time activities

Discovering Lefkada – boat trip:  1  2  2  7  19

Visit to Eco house: 0 5 5 12 8

Video projection – educational videos about toys created by participants: 0 1 1 7 21

Comments:

We were too tired to visit the eco-house after boat trip.

Perfect.

I think it would be interesting to help to make the eco-house. I love boat trip, but please the next time, search other boat with boat with more space to sit please.

I like visit the eco house but I think that we could participate at other more dynamic way.

Would have been really better if we were not exhausted. Boat: like the beaches, but disappointed to see nothing but this but really good any way. But still I won't do it again too many people too loud too touristic.

Lovely boat trip but so long and crowded. We were too tired for the eco house.

The boat trip was not so good because the boat was crowded.

It was all perfect, a great experience.

Too short during siesta time to move somewhere else. Boat trip was too touristic, too mainstream (we basically were feeling like a bunch of dummies)

For making the video there was no soft that we can use to edit it.

We would ask for more toys for making videos. There was not enough technical support also.

I love video projection. Videos were very funny.

Visit to the eco house should take place in other day because after the boat this I couldn't pay attention to what happened.

I specially enjoyed the boat trip I think it was good opportunity to meet each other.

Free time was obviously good with the sea and country but it also helped us to keep focuses and energized us.

Boat trip – the best!

Fantastic face time moments.

Boat trip would have been nice if we had places to sit properly.

Boat trip was cool but a bit tiresome, videos – I didn't like and understand some participants videos.

Learning about Edu GamEco

Creating photo comic: 3 1 4 7 15

Workshop with Ekaterini: 8 10 9 1 2

World coffee: 0 4 3 6 18

Puppet workshop: 2 2 3 6 10

Planning the toys: 2 1 3 9 16

Creation of the toys: 3 0 2 6 19

Planning the educational videos: 2 1 3 8 17

Creation of the educational videos:

3 0 5 4 19

Did you have enough opportunities to learn about educational and ecological toys?

Yes, I did.

I think we haven't had enough opportunities to learn more things about ecological ways to work with toys.

Yes.

Yes of course, This idea is great. The one bad thing is a lot of time with the toys.

Yes I've learned a lot of new things about that we need more time to know better.

I think we did not really talk about ecological toys.

Of course, we had the opportunity to speak with experts and leaned a lot.

Not enough. For me stay a bit on the surface.

It was a little bit difficult to understand how to make this toys, because we have to develop our idea, but after that we discovered these is no that material we need.

So to me it was not so clear about educational and ecological conspectus.

Yes. Thank you for letting us even make them ourselves.

Yes, I have enough opportunities to learn.

For me it was a bit stressful to try to do the toy and puppet at the same time.

I learned to planning and create new toys. I know now how are positives and negatives aspects.

Didn't think i learned more about it just for the educational but for me the point was to imagine a game.

Yes, I moved like to learn more.

Never enough, but because i don't want to leave this exchange.

I did and I have a better understandings of it.

Yes, everyday.

Yes, I did.

Team Building activities

Treasure hunt: 2 3 7 8 12

Teambuilding on the beach: 1 3 5 3 19

Planning for the future and closing activities

Open Space for future projects:

3 2 1 8 18

Writing our own learning achievements (8 key competences):

👍 0 🗳️ 3 📄 1 🗣️ 13 🗑️ 18

Final evaluation of the project:

👍 1 🗳️ 2 📄 0 🗣️ 13 🗑️ 19

Facilitators and staff

Facilitator: 👍 2 🗳️ 0 📄 2 🗣️ 4 🗑️ 23

Volunteer team: 👍 2 🗳️ 0 📄 1 🗣️ 5 🗑️ 23

Do you think the facilitators/volunteers were competent? Do you have any advice for them?

All the staff was competent and really took in consideration the daily evaluation.

I advice volunteers and facilitation. They are very helpful and great people.

The most of team are competent, but Cyriel was impolite with me when interrupted my talk with other reason and supporting the bad behaviour of the French group.

They did their best and all them had motivation.

Every person are fantastic but I don't understand what is the work of some. Maybe it could be correct give a more useful. The help for make a videos it is great.

Majority the volunteers had been a help for but not all.

Volunteers have work very well I think that they helped to everything needed but it also depend of them work. Some volunteers have help more because his work was different.

Yes, I will like to stay with Cyriele.

The were really available and kind to us. Perfect.

They have been so kind with us offering their competence, time and patience.

I am impressed by your work. I've never seen volunteers from projects to be so quick to respond to our suggestions/demands complaints.

I think the facilitations and the volunteers were competent and respectful. They helped us to reach our goals and they never let us feel alone and disoriented.

They were really nice and patient with us, I have nothing to complain about. I just want to say they thanks.

Yes, I will like to say with Cyriel.

Yes, volunteers are competent.

They were perfect. Stay like this we love you.

All who worked in this project was very nice competent and really very helpful if we need something.

Only one advice to volunteers, who worked in the kitchen – be more communicative.

Volunteers seemed to be prepared and motivated. Thank you for support and understanding our needs.

Yes. Totally agree that facilitators were competent. They were the best so i don't have any advice. I love all members of staff.

I do think that facilitators were competent and they were very opened to our needs.

They are very competent, they are working hard and they gave us lots of great advices.

I think they are very competent because always have helped me when I had needed them.

They were amazing, helpful, friendly.

They helped us nad very knowledgeable and kind.

Obviously they planned lot of things and they are skilful enough. But my advice would be that

they try to not plan that much things, because sometimes i felt like a big child and it is not a good feeling. Also in that way participants can learn how to be autonomous.

Yes, I think they did a good job.

They were cool and really kind with the missing of cleaning the dishes.

They were great, maybe I'd like to spend more time with them.

All of volunteers and facilitators were patient, friendly, competent. I saw that they enjoy their work. Big thanks all of them.

Except for Ekaterini everybody was great and rally responsive.

I just want to appreciate their hard work with us.

Other aspects

How do you think you have contributed to the Youth Exchange and the learning process?

I'm afraid i wasn't able to bring that much to the table because i got sick and i'm really sorry for that.

With my involvement.

I have contributed with my experience in Erasmus + programme.

I shared my experiences and my ideas (maybe to much). Translate for the French. Smiled and laughed a lot.

I did a great toy by hands and I hope citizen will like it.

I love the feeling that my design background skills make useful for people (my group actually) to know how to rise a project, also learned some video/filming to my group.

I think I have contributed with my knowledge of education and pedagogy.

I contributed with new ideas and discussing with the others participants.

My contributions consist in creating up with many ideas regarding the creating of the toys even through I didn't have too much in practical field of this project.

I made some people happy. I helped in creating our toy. I played with kids and it was a great time for me and for children.

I shared my knowledge and experience. I tried to help others activities.

I love opportunity to practise my English. I learned a lot of about different cultures and to do my best.

I hope so, otherwise this exchange would have been useless. (oh sorry i didn't read "how")

It's great but was hard for me to integrate.

With my biomedical knowledge I've contribute talking about this kind of things, wish my friendly and extrovert character i made new bonds with everyone.

I have I have contributed with my will to learning and to do things. I contributed with my positive mood and education.

I tried my best. Although I had no experience on connection with the topic of the project.

I think I have contributed with my creativity.

I just tried to be involved because it was interesting.

I have contributed with my ideas in the creation of the toys I've also helped a bit transtate to my

partners to improve our communication.
I think that I have contributed with my knowledge about education.
The students use to learn through the books but we never (or a little times) learn thanks to practical and real experiences.
Active participation, expressing ideas.
I have some difficulties to contribute because of my lack if knowledge about English language.
I gave my ideas, passion and love.
Maybe bouncing ideas around, surely with creating the video.

What should we do in a different way next time?

Maybe consequences for people who disrespect rules. For me it was an extra stress as a group leader and there were some travelling issues but i hope everything will be ok.
It's always something different in the next time. You are professionals so time to time you going to do better and better.
Better accommodation (if camping again, in a shadowy place so the tent are cool)
More energizers and maybe to hold the project in a colder month of year.
I think it is necessary a special place to work due to hot weather.
Health food, variety of food, better quality of food.
Maybe, if I were you, use more music and sport to order to do feel together all people. Some persons don't speak English very well (me for example) and this is would help.
I think that there will be more free time.
I've really like this exchange but I think that can improve something like the food quality and the accommodation for the project.
It' s was really hard in the beginning but really better in the end when we started creating toys.
Quality of the food.
Maybe a dreams for peace project in Lefkada? People would be crazy about it.
I think you should organise better the breakfast/ lunch/dinners time. Sometimes there was not enough food for all.
Organise the meal in better way.
Integrate.
Be more flexible. At the beginning I felt it too childish and when people are treated like children, the become to act like children, but it was really better at the end.
Just give all necessary information about the staff we need to bring with us.
Just more fruits and beds (not tents)
I don't have any ideas. I think all member of staff were hard working and they did everything they would.
I think the groups made to do the toy wasn't balanced.
I think it would be necessary to change the way of doing the activities with more bedroom to the participant that it is not obliged to speak and let them do.
Start the creation of toys earlier like 1 day so that we are not getting tired of team building games there is good but I think to much.

Much better internet connection, more greek fruits, more greek salad.
I don't know make it larger.

What are you taking home with you?

A lot of earned patience with people and knowledge on sustainable actions.
A new way of loving.
My language, good mood and great memories.
A really better English, a lot of swearing words in Slovenian, Russian and some cool things, and a bottle of Ouzo too of course.
The sun the suntan, memories and good mood.
Communication listening sills, patience, with language team work and a well turned skin.
I will take to home my new contacts new dreams, new aims.
New knowledge about other cultures.
New knowledge about toys, cultures. Friends and memories.
I'm taking home with me a lot of memories, learning skills, different spirit.
I'm taking new experiences that project gave me. I'm taking also great memories, new skills, communication with deaf people and people who can't speak English.
Positive energy.
Positive energy, new knowledge about handmade toys. New friends.
All my memories of this beautiful landscape, the smile of each member of our group, the feeling that I have no regrets. New friends from 8 different countries that have to visit. The feeling that I belong to Greece and I'll live here someday.
Memories.
A lot: new information about new cultures, new topics and new languages, my horizons expended.
I'm taking home with me unforgettable moments of nature contact and social relationship.
New skills and knowledge, good vibes, maybe 2 kilos, and the inspiration to start crating things.
A lot of friends, memories knowledge and a new point of view about life.
All the good energy, the memories, the experience, the landscapes, the team, the participant.
I take to home a lot of new experience, to leave more about myself I think that the best is that I've know a lot of new friends.
I have leaving a lot of things for foreign people, a lot of things for toys. I have learned my speak and listening English.
A lot of things. I never think. I'm be able to stay here. I feel very confident with myself.
Memories, experiences, knowledge, friends.
A wonderful experience and a bit of English.
Souvenir, new ideas, new peoples contacts.
More interest in education and lots of new friendships.

I'd like to say:

Reko and Cristina you are amazing.

That it was for the fifth time when I was in a tent, and it was very nice.

Thanks for everybody, you opened my eyes on many things, I will never forget trip to Greece and this exchange.

That It couldn't be let to some people to have a bad behavior about lack of respect from part of French girls.

Thank you for being accepted in this project.

Thank for all. This experience make me think I became volunteer in Erasmus + .

It was a very good experience for me.

That it is a very good experience that I recommended to everybody.

Thank you.

Thank you to the facilitation, the volunteers team, the cook and camp owners.

That this project was well organized and the facilitations did a good work. We really had a great time together and. I will not forget it.

That it was a great opportunity and now I'll come back with new ideas and a bigger cultural baggage.

I'll see but I'll maybe looking for the EVS about ecological – sustainable village.

Thank for everyone who was involved. I really enjoyed the time here.

Thank you being positive supportive. You did your best in comforting needs of each of us.

I'm glad that I can participate in this project. It was my first project but not the last Thank you facilitators for everything.

I'd like to thank Reka for your patience with us.

That everything was perfect and beautiful.

It has been an amazing experience.

A huge thank to all participant, facilitators, volunteers. This was close to a changing life experience on may points for me.

Thanks a lot the summer holiday organization.

Tanks to Issam for the wood. Tanks to Reka for the tolerance.

Tanks to the volunteers for helping us. Tanks to people for being so cool.

Thank you.

THANKS FOR YOUR ATTENTION AND PARTICIPATION
