

Short guide for publishing elements on the Connect Act Youth GIS map

As one of the activities of the Connect Act Youth project, the development of a GIS map aims to connect all project partners, enabling them to share various information beneficial to partner organizations and users of their projects and activities, both internally and publicly.

Primarily, the GIS map is designed to connect all partners, their youth workers, and youngsters, showcasing policy initiatives for young people in partner communities, network activities, opportunities for youth and youth workers, as well as tools and good practices in the field of youth within the consortium's communities.
